Visualization of Biological Data
Project Prework

December 17, 2018

1   Time table

- 17.12.18-21.12.18: Stage 1.

  Server: Constantin Holzapfel
  (data reading and controlling)

  Data filtering functionality: Nicolas Brich
  (getting data by metadata keys, grouping)

  First plot/chart: Daria Evseeva
  (choose a suitable main visualization and implement for unfiltered data)

  Website layout: Sarah Ertel
  (css, html styles, icon images, markers)

  Metadata information visualization: Eduardo Vela
  (one web-page with small simple plots for important metadata information: age, sex, BMI-index etc.)

- 07.01.19-11.01.19: Stage 1. [continue]

- 14.01.19-18.01.19: Stage 2.

  Combining the functionality together.
  Adding more visualization methods.

- 21.01.19-25.01.19: Stage 3.

  Testing and debugging.
